

The EcoOnline Impact

How we can support your Environmental, Social, and Governance (ESG) objectives and Sustainability Development Goals (SDG)

Managing your ESG goals and objectives

EcoOnline’s intuitive dashboards make it easier to evaluate and understand ESG & sustainability performance.

EcoOnline has a holistic approach to ESG and sustainability management, and performance reporting. Our solutions are highly configurable, enabling all activities to be tagged and tracked against the company's sustainability goals and objectives to build a robust environment & sustainability culture through training and e-learning. All reporting can be tailored to fit the organizations' internal performance metrics or against a desired standard or framework.

Gain efficiency and control by collecting all the data in EcoOnline’s quick and easy-to-use dashboards. With a single source of truth, it’s easier to identify areas for improvement and to monitor progress against goals.

✓ **Instant overview of sustainability and ESG performance**

✓ **Better insights to evaluate and improve business strategies**

✓ **Accurate and reliable data**

EcoOnline EHS Software

Track, monitor,
& report ESG
performance

To ensure effective business governance that aligns with your organisation's identified sustainability goals, you need a centralized system to keep your ESG and sustainability reporting up-to-date and easily accessible.

Become a true ESG champion by collecting and promoting your sustainability performance through a central system, such as gender equality, inclusion, modern slavery, labor rights, health and safety, anti-corruption, and anti-bribery.

EcoOnline's intuitive dashboards give an instant overview of the performance. With a single source of truth, it's easier to identify which areas you can make improvements to and monitor progress against your goals.

Incident Reporting Software

Promote a safe and secure working environment for all

Reporting incidents, near misses and accidents in the workplace raises awareness about things that can go wrong and allows you to take preventative and corrective actions to make workplaces safer.

EcoOnline's software makes it easy for employees and partners to record incidents and accidents - on any device. This encourages employee engagement and positive safety culture. Your business saves time and creates a positive impact on inclusion and productivity.

With a digital incident reporting tool, you can control several ESG topics and achieve SDG goals number 3, good health and well-being, and number 8, decent work and economic growth.

Environmental Reporting Software

The starting point for Net Zero Journey

EcoOnline's environmental reporting module is fully customizable to fit your organization, and it is straightforward to use. It doesn't just help you track scope 1, 2, and 3 emissions, water, and energy consumption - it enables you to reduce the carbon footprint.

The module can be used as part of your internal reporting processes and to report against global ESG reporting frameworks to help build trust and transparency among stakeholders.

EcoOnline's Environmental module helps you report on the essential metrics within ESG and ensure you are well on track to meet the sustainable development goal number 6 Clean Water and Sanitation, 7 Affordable and clean energy, and 12 Responsible consumption and production.

ENVIRONMENTAL

Risk Assessment Software

Get control over your ESG and EHS Risks

EcoOnline's risk management programs can help your organization identify the hazards, address a wide range of risks, and ensure effective improvement actions are assigned.

ESG risks typically fall under the following categories:

- Environmental risks include greenhouse gas emissions, toxic chemicals, and waste management.
- Social risks involve assessing supplier values, improving company working conditions, health and safety, stakeholder interests, and labor practices.
- Governance Risks refer to how companies address transparency in their business conduct and cover everything from diversity to effective regulatory compliance.

By adopting EcoOnline's risk management tool to streamline your processes with consistent risk assessment and evaluation methodologies, you are one step closer to reporting on central ESG metrics and the development goal number 3, good health and well-being.

Audit Management Software

Manage compliance against commonly used ESG and EHS standards and internal policies

Historically, reporting for ESG has been the responsibility of multiple departments with little intercommunication. With EcoOnline's Audit software, you can centralize the data flow and manage your ESG audits in one central location.

With EcoOnline's Audit Management software, you can rest assured to provide any stakeholder with comprehensive and accurate ESG data.

Conduct internal audits to understand opportunities for improvement and ensure ESG disclosures' accuracy.

Understand your ESG audit data and make data-driven decisions. Create and configure anything from ESG scoring methods and checklists to questionnaires and scoring rules. Through automated scheduling notification to your staff, you can ensure audits are conducted effectively and on time.

EcoOnline's Audit module is a valuable tool for handling corporate governance-related tasks, including health, safety, environmental audits, and preparation for ISO certifications.

Corporate Social Responsibility Software

Manage social commitments

EcoOnline's Corporate Social Responsibility (CSR) module consolidates data collection to monitor and track critical metrics around corporate social responsibility. The highly configurable platform can log multiple social outcomes for a single CSR activity.

By tracking the impact of your business CSR program, you can relate to several development goals, such as goal number 3, Good health and well-being, number 8, Decent Work and Economic Growth, and number 11, Sustainable Cities and Communities. CSR also has a high correlation with the social metric within ESG.

Chemical Safety Software

Reduce the impact of
your chemicals on
people and the
environment

Besides being a threat to health and safety, chemicals also account for significant CO2 emissions. A recent report by the European Environment Agency (EEA) states that the chemical industry accounts for the highest energy usage in the world.

By working strategically to reduce the amount of hazardous chemicals, risks, and exposure to chemicals, the EcoOnline Chemical Management solutions enables companies to report on results of several of the UN's sustainability goals, such as number 3, good health and well-being, number 6, Clean Water and Sanitation, and number 12, Sustainable consumption, and production.

Learning Software

A strong safety & sustainability culture starts with knowledge

Employee training is vital to staying attractive as an employer, reducing accidents and improving workplace safety. To reduce risk and protect employees and the environment, businesses in all industries need to conduct employee training to stay compliant, reduce accidents, occupational diseases, and contribute to less environmental impact.

Centralizing all ESG and sustainability training programs in Learning Manager makes it easier to avoid potential regulatory compliance issues. Training and overall progress can be tracked, and businesses can ensure compliance with renewable certificates and easily share information with company executives, authorities, and third parties.

Crisis Management Software

Safeguard lives and the environment in the event of an incident.

Poorly managed environmental or social issues, such as fatal accidents, or a leak of hazardous chemicals, prove a strong link between ESG and Crisis Management. By digitizing the crisis and emergency response plans it becomes easily accessible to the employees who need them.

EcoOnline's intuitive Crisis Management Platform improves the businesses' resilience, ensuring that the crisis response and follow-up actions are following the governance pillar in ESG.
